

# Section 18 Exemption for Huanglongbing (HLB) in Florida Citrus

**FireLine™**  
17 WP

## FireLine™ 17 WP .... Turning the Table on HLB

*If you grow citrus, you know just how devastating HLB has been. When the risk of HLB threatens your grove, turn to a partner you can count on - FireLine™ 17 WP from AgroSource. FireLine™ is a new tool to help you manage HLB. With FireLine™ you can create an effective program for season-long and future protection against HLB.*

FireLine™ 17 WP is registered for use against Fire Blight in apples and pears and Bacterial Spot in peaches and nectarines. See label for details.

# Why FireLine™ 17 WP?

Feature	Benefit
❖ Effective HLB management	❖ Reduces CLas bacteria and HLB symptoms in Florida citrus
❖ Systemic action	❖ Use of AgroSource identified adjuvants enhances systemic movement in the tree
❖ 'Caution' signal word	❖ Provides wider margin of safety
❖ Unique mode of action (FRAC 41)	❖ Effective resistance management tool when used with FireWall™ 50 WP
❖ Superior formulation	❖ Ease of handling, mixing, spray application
❖ Excellent stability profile	❖ Convenient inventory management
❖ History of strong performance	❖ Years of successful control of bacterial spot of peaches and nectarines & fire blight in apples and pears

Note: For citrus, FireLine 17 WP should be applied in accordance with the Florida Section 18 Exemption granted for its use in Florida citrus against HLB. See Florida Section 18 Exemption Letter for FireLine 17 WP label for details. Always read and follow label instructions.

*Your partner in season-long  
HLB management*
